Table 12.1

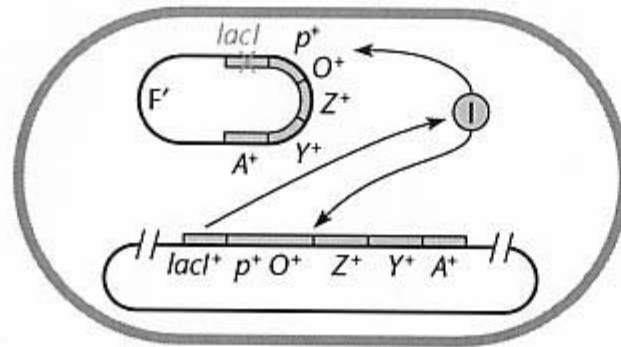

TABLE 12.1 Genetic behavior of <i>lac</i> mutations		
Mutation	Inducibility	Complementation behavior
<i>lacZ</i>	Noninducible	Recessive; <i>trans</i> -acting
<i>lacI</i>	Constitutive	Recessive; <i>trans</i> -acting
<i>lacI<sup>f</sup></i>	Noninducible	Dominant; <i>trans</i> -acting
<i>lacI<sup>d</sup></i>	Constitutive	Dominant; <i>trans</i> -acting
<i>lacI<sup>a</sup></i>	Inducible <sup>a</sup>	Dominant; <i>trans</i> -acting
<i>lacO<sup>c</sup></i>	Constitutive	Dominant; <i>cis</i> -acting
<i>lacP</i>	Noninducible	Recessive; <i>cis</i> -acting

<sup>a</sup> Tighter on-off control.

Figure 12.3

A

Merodiploid

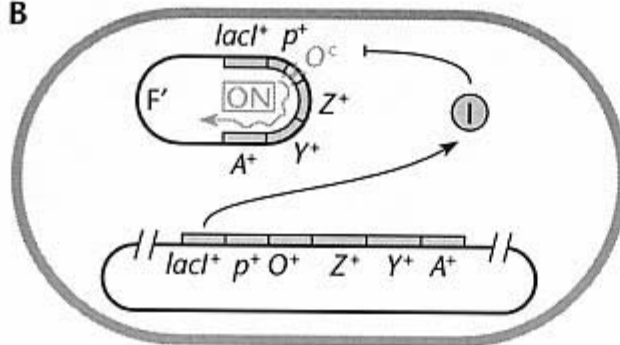

Phenotype

Lac<sup>+</sup> inducible

Interpretation

*lacI* is recessive

B

Lac constitutive

*lacO<sup>c</sup>* is dominant  
and *cis* acting
