

# LDM Medium Recipe

## Directions

Modification of Lewin's marine diatom medium.

### For 1 L Total

1. To approximately 950 mL of pasteurized seawater (30 ppt), add each of the components in the order specified (except vitamins) while stirring continuously.

2. Bring total volume to 1 L with non-pasteurized seawater.

\*For 1.5% agar medium add 12 g of agar into the flask; do not mix.

3. Cover and autoclave medium.

4. When cooled add sterile vitamins.

\*For agar medium add vitamins, mix, and dispense before agar solidifies.

5. Store at refrigerator temperature.
