

Sphagnum extract Recipe

Directions

Sphagnum extract is prepared by autoclaving @20 min, 25 g finely ground Sphagnum peat and 0.5 g Ammonium Ferric Citrate in 1 L distilled water. Allow to cool and settle, using the supernatant only.

#	Component	Amount	Stock Solution Concentration	Final Concentration
1	Sphagnum peat	25 g/L		
2	Ferric Ammonium Citrate	0.5 g/L
