

# Spirulina Medium Recipe

## Directions

Modification of the SAG medium. Alkaline media suitable for LB 2340 *Spirulina platensis* and LB 2342 *Spirulina maxima*. In order to prevent the formation of precipitates during autoclaving, two solutions are prepared as follows:

For 1 L Total

1. After both solutions 1 and 2 are sterilized, transfer the contents of Solution 2 into the flask containing solution 1, and swirl to mix thoroughly.
2. Store at refrigerator temperature.

#	Component	Amount	Stock Solution Concentration	Final Concentration
1	<a href="#">Spir solution 1</a>	500 mL/L		
2	<a href="#">Spir solution 2</a>	500 mL/L
